U.S. Government Required Disclaimer

Commodity Futures Trading Commission Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the FOREX, futures and options markets. The past performance of any trading system or methodology is not necessarily indicative of future results.

Recommendations To Help You Excel

The following recommendations are to help you get the best and most profitable experience from your use of this software and trading Forex in general.

Please consider following these recommendations as we have reviewed them and utilized them for years successfully – including hundreds of other traders we work with.

Which Forex Broker Should You Use?

We highly recommend Blaze Markets they are a respectable broker that works well with Automic Trader and are prompt with withdrawals and offer good support.

You can find Blaze Markets here: <https://www.blazemarkets.com>

Blaze Markets is a broker created by traders that got tired of dealing with poorly run brokerages. They wanted to create one that supports robot trading with optimal conditions. There are very fast execution speeds and competitive pricing.

After signing up with a Forex broker download and install Meta Trader 4, which is provided free by them. (Preferred is 200 leverage).

Account Type to Use

PRO accounts are preferred with lower spreads and good processing but works with STANDARD accounts and CENT / MICRO accounts. Minimum recommended deposit is \$3,000 - \$5,000, but works far better with more such as \$10,000 - \$20,000 minimum.

Please proceed to the next page for installation instructions...

Use A VPS and Everything Will Run Even If Your Computer is Off...

You can avoid leaving your computer on and access your platform from any mobile device using a virtual server. We highly recommend using a VPS always for trading.

Click the link below to learn more about what a VPS is, why we recommend them, and the most reliable and affordable options that we recommend.

[Click Here for VPS Recommendations](https://www.leapfx.com/vps) - <https://www.leapfx.com/vps>

Want Someone to Install And Setup Automic Trader For You?

Don't feel like setting up the software or prefer someone else to do it for you? Not a problem, click the link below and have a pro do it for you.

[Click Here to Have a Pro Install Automic Trader for You](https://www.fxinstall.com) - <https://www.fxinstall.com>

Don't Forget to Activate Automic Trader In Members Area

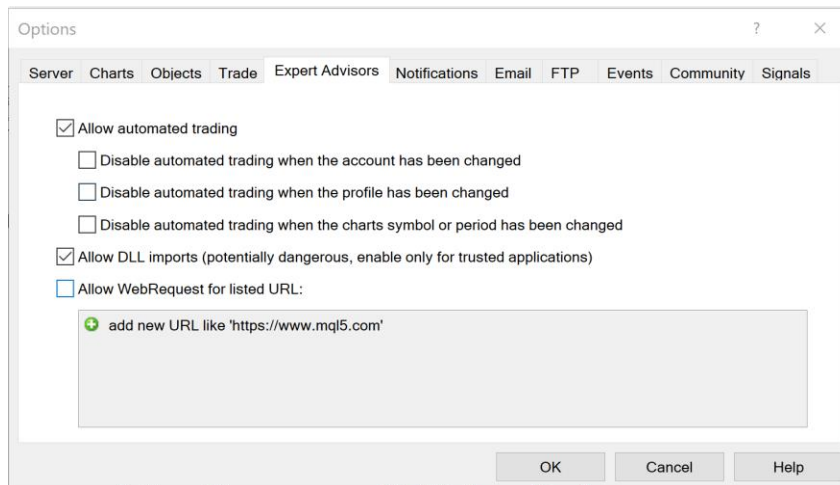

If you haven't already, please go back to member's area and scroll down to the section where you must activate Automic Trader with your broker MT4 account number / login number.

This is necessary to allow the software to run on your account. It can be changed anytime if you choose to switch accounts or brokers.

[Click Here To Go To Members Area](https://www.leapfx.com/at-members/) - <https://www.leapfx.com/at-members/>

Automatic Trader Installation

1. Install Meta Trader 4 platform provided by your broker free and open it.
2. You will need to do the following configuration. At the top of MT4, Click Tools>Options>Expert Advisors. Check the same boxes as indicated below, then click Ok:

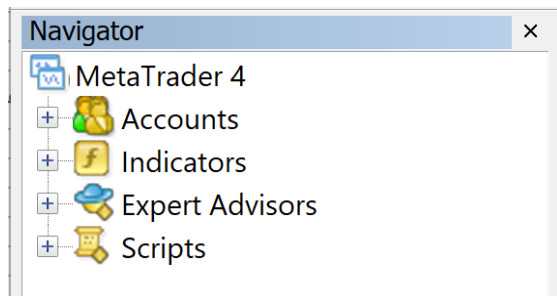

3. On the top of Meta Trader 4 make sure the AutoTrading is pushed in and GREEN, click it, if it's RED.

4. To install **Automatic Trader** you will need to load the **AutomaticTrader.ex4** file into the platform's data folder: At the top left of the platform click File>Open Data Folder>MQL4>Experts> and place the **.ex4** file there. Now restart the MT4 platform.

5. You should see Navigator window in your Meta Trader 4 platform on the middle left with **Automatic Trader** in it (if you don't see it please click the + sign next to Expert Advisors):

Setting Up Automatic Trader

Copying This Manual Or Software For Distribution Without Permission Is Strictly Prohibited.
Automatic Trader on Steroids - Copyright 2023, All Rights Reserved.

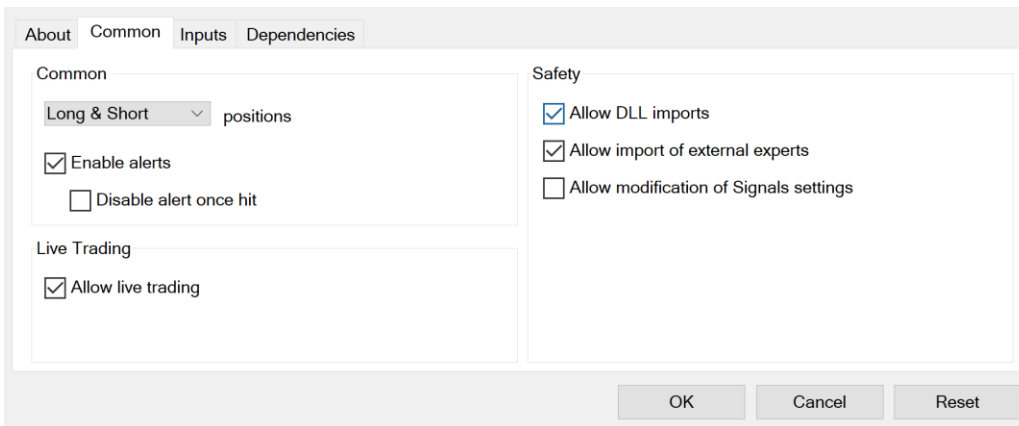

6. Now we need to open the window within Meta Trader 4 for the currency pairs that the robot will be trading on. To do this click the **File** button at the top left, then click on **New Chart**, then you will look for the following currency pairs: **GBPUSD, EURUSD, AUDUSD, EURGBP, AUDNZD, USDCAD** and click them to open OR right click on the PAIRS in Market Watch (a box with currency pairs on left side of the platform) and click Chart Window (if not you don't see some pairs, right click in the box and click SHOW ALL).

For each currency pair chart that you open - click on **"M15"** button towards the top of the screen to adjust the timeframe of that chart - do this before opening the next pair. This means each candlestick bar on the chart represents 15 minutes.

7. Now click **Automatic Trader** from the Navigator window (refer to step 5) and drag it onto each currency pair from step 6 or you can right click the **name** and choose "Attach to a chart" – it will attach to whichever chart you have in focus / open on the screen.

8. Once you attach **Automatic Trader** to a chart window, a box will appear like the following below. Click **Common** then make sure the check marks match the following (then click **Inputs**):

9. Under inputs... **enter your RECEIPT into the proper space**, then...

You only need to adjust the **Starting Lot** setting, which is adjusting the lot size / risk for the system.

Once you have adjusted settings. You can click OK. And the software will begin running for you and you don't have to do anything from there. Now do the same for the other pairs provided in the last step.

Read on for recommended **Starting Lot** settings below...

Expert - Automic Trader Steroids 2

About Common Inputs Dependencies

Variable	Value
Receipt	Enter Your Receipt Here
Starting Lot	0.01

Load

Save

OK Cancel Reset

Starting Lot Recommendations:

You can of course adjust or choose how you want to adjust the risk settings, but if you would like some guidance here are our recommendations.

The lot size starting is defaulted to .01. Adjust your lot size accordingly, based on risk you desire:

Higher Risk Like Us: .01 lots per \$1,000

Medium Risk: .01 lots per \$3,000 to \$5,000

Lower Risk: .01 lots per \$5,000 - \$10,000

Once done changing any settings, click OK and the robot will start running. Note it won't trade instantly, but make sure NO errors in journal and expert tab. Repeat this for each pair running Automic Trader on.

If everything is loaded properly, there will be text stating: Automic Trader On Steroids with a smiley emoticon on the top right of each currency pair chart you setup.

That is it. Configuration is finished! Let it run on its own 24/7. A VPS is HIGHLY Recommended - A VPS means it will run even if your computer is off and doesn't need to be installed on your computer.
