## ***U.S. Government Required Disclaimer***

Commodity Futures Trading Commission Futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the FOREX, futures and options markets. The past performance of any trading system or methodology is not necessarily indicative of future results.

## IMPORTANT Recommendations

The following recommendations are to help you get the best and most profitable experience from your use of this software and trading Forex in general.

Please consider following these recommendations as we have reviewed them and utilized them for years successfully – including hundreds of other traders we work with.

### Which Forex Broker Should You Use?

This is a broker we highly recommend. They are respectable and work well with LeapFX trading systems, promptly handle withdrawals, and offer good support.

**The broker is Blaze Markets you can find them here:** <https://www.blazemarkets.com>

Blaze Markets is a broker created by traders that got tired of dealing with poorly run brokerages. They wanted to create one that supports robot trading with optimal conditions. They have very fast execution speeds and competitive pricing.

After signing up with the broker download and install Meta Trader 4, which is provided free by them. (Please choose 200 leverage minimum).

### Account Type to Use

PRO accounts are preferred with lower spreads and good processing but works with STANDARD accounts too. Minimum recommended deposit is \$3,000 to \$5,000 minimum to maintain safer risk with margin, although it can work with less. Even better would be \$10,000. More funds in the system helps it perform far better. It can work with \$1,000 minimum if needed.

## **Use A VPS and Everything Will Run Even If Your Computer is Off...**

You can avoid leaving your computer on and access your platform from any mobile device using a virtual server. We highly recommend using a VPS always for trading.

Click the link below to learn more about what a VPS is, why we recommend them, and the most reliable and affordable options that we recommend (they are inexpensive).

The preferred VPS service is the CNS option on the page, and selecting London Data Center when prompted.

**[Click Here for VPS Recommendations](https://www.leapfx.com/vps)** - <https://www.leapfx.com/vps>

## **Want Someone to Install And Setup Power Growth Trader For You?**

Don't feel like setting up the software or prefer someone else to do it for you? Not a problem, click the link below and have a pro do it for you.

**<https://www.fxinstall.com>** - <https://www.fxinstall.com>

## **Don't Forget to Activate Power Growth Trader In Members Area**

If you haven't already, please go back to member's area and scroll down to the section where you must activate Power Growth Trader with your broker MT4 account number / login number.

This is necessary to allow the software to run on your account. It can be changed anytime if you choose to switch accounts or brokers. It's 1 account per license at a time.

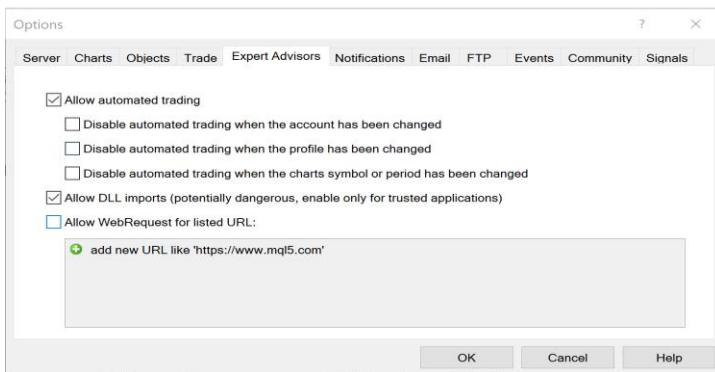

**[Click Here To Go To Members Area](https://www.leapfx.com/pgt-members/)** - <https://www.leapfx.com/pgt-members/>

# Power Growth Trader Installation AND Setup

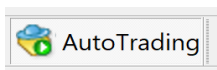

Thank you very much for your purchase, welcome to the Power Growth Trader System.  
In this guide, we will look at how to install your EA and how to set it up.

## 1-Installation

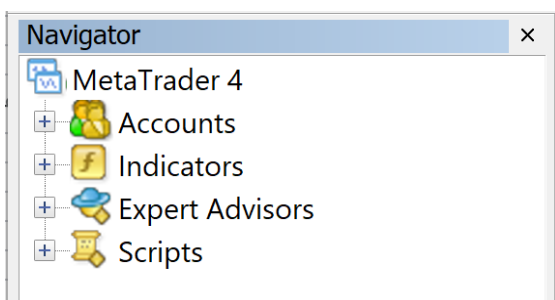

1. Install Meta Trader 4 platform provided by your broker free and open it.
2. You will need to do the following configuration. At the top of MT4, Click Tools>Options>Expert Advisors. Check the same boxes as indicated below, then click Ok:

3. On the top of Meta Trader 4 make sure the AutoTrading button is pushed in and GREEN, click it if it's RED.

4. To install **Power Growth Trader** you will need to load the **Power Growth Trader.ex4** file into the platform's data folder: At the top left of the platform click File>Open Data Folder>MQL4>Experts> and place the **.ex4** file there. Go back to Data Folder and look for Presets folder, in that folder, place all the files from the Preset folder that we provided accompanying this manual. Now restart the MT4 platform.
5. You should see Navigator window in your Meta Trader 4 platform on the middle left with **Power Growth Trader** in it (if you don't see it please click the + sign next to Expert Advisors):

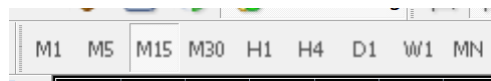

## 2-Set-Up

6. Now we need to open the windows within Meta Trader 4 for the currency pairs that the robot will be trading on. To do this click the **File** button at the top left, then click on **New Chart**, then you will look for the following currency pairs and click them to open or right click on the pairs in Market Watch (a box with currency pairs on left side of the platform) and click Chart Window (if the pair is missing, right click in the box and click SHOW ALL).

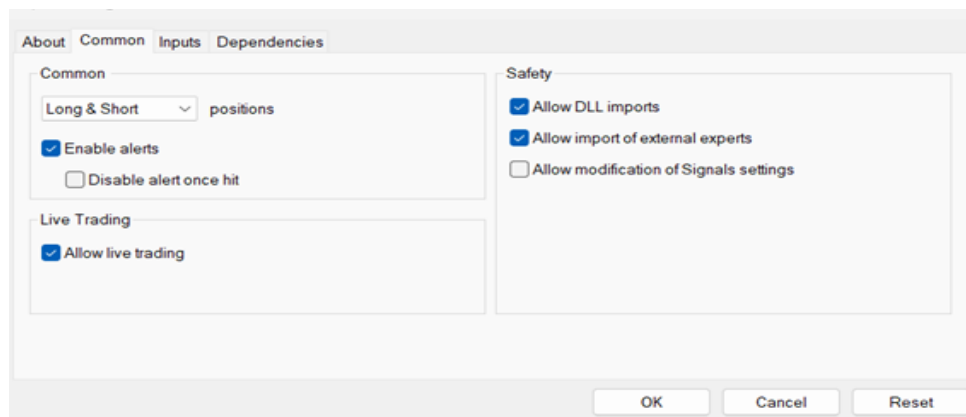

These are the pairs to open: **AUDCAD, GBPAUD, NZDCAD, GBPCHF, EURCHF, EURGBP, GBPCAD**

Some brokers have a suffix to their pair, for example: EURUSD+ or EURUSD.pro. So just make sure the instrument is correct and able to be traded. It does not matter if there is a suffix to the pair, it will still work with the software.

Now you need to hit the M15 button on ALL of the charts to get them all to M15 timeframe – click on each chart one at a time, then click H1 at the top one at a time – you can see the H1 button in the image below...

Once you have all the charts open on the M15 timeframe, drag **Power Growth Trader** to EACH of the charts from the left side where you see it under Expert Advisors, once it's placed on the chart a box will come up, make sure the check marks match below...

Next click **INPUTS** to find the robot settings...

Variable	Value
> > > > > > > > >	<==== EA Common Info ====>
Receipt	Enter Your Receipt Here
Email	support@leapfx.com
> > > > > > > > >	<==== General Settings ====>
Set Name	Empty
Magic Number	14001
Slippage	5
Lot	0.01
DepoPer001Lot	0.0
Take Profit	20.0
Dynamic TP: Channel Percent	0
Dynamic TP: Min Size	10.0
TP: Include Swap and Comission	false
> > > > > > > > >	<==== Extra Settings ====>
StopOpenNewOrders	false
Max Spread BUY	0.0

Buttons: Load, Save, OK, Cancel, Reset

Under inputs...

Click **LOAD** on bottom right.

Then you will need to select the Preset file that is for the pair you are setting Power Growth Trader on, then click OK, that will load the appropriate settings for you that are best.

Next, enter your **RECEIPT Code** into the **RECEIPT** field (don't forget to activate your copy first in members area, you can leave email as is), then...

## **RISK**

For risk there are 2 options.

- 1. Compounding option** – For this method you can ignore lot size setting and focus on **DepoPer001Lot**, this will increase the lot size as the account grows. For lower risk use 1000 for this setting, for higher risk use 500 for this setting. That is recommended. You can of course adjust it freely; it will increase the lot size by .01 per 500 or 1000 based on that. You can increase it and decrease it accordingly if you desire.
- 2. Non-compounding option** – This option is safer than the compounding option overall. So if you are risk averse it's best to not compound for now and increase it manually slowly. To use non-compounding, **DepoPer001Lot** must be equal to 0. Then set Lot to .01 For Every \$1,000 for Lower Risk. And .03 For Every \$1,000 for Higher Risk. For example, for lower risk if you have \$5,000 it would be .05 lots ( $.01 * 5$  (for each 1,000) = .05).

**Once done editing settings click OK. Then the robot will run, you can let it run 24 / 7 without touching it. Make sure there is a HAPPY FACE on the top right of each chart – Repeat this for each pair you are setting up.**

**Other settings description.** You can access the Expert settings at any time to make changes to your inputs when the EA is running, you don't need to keep dragging to a chart, right click on the chart and you will see expert advisors -> then properties.

**Make sure NO errors in journal and expert tab if you are concerned it is not working at anytime.**

**That is it. Configuration is finished! Let it run on its own 24/7. A VPS is HIGHLY Recommended - A VPS means it will run even if your computer is off and doesn't need to be installed on your computer.**

**Settings Descriptions** – Note, here are a definition of the settings you can adjust. Please be careful adjusting as it will dictate how the robot operates.

<b>&lt;== General Settings ==&gt;</b>	<b>Main settings</b>
<b>Set Name</b>	Name of the set file.
<b>Magic Number</b>	EA magic number.
<b>Slippage</b>	Slippage in old points
<b>Lot</b>	Fixed lot size for the EA to open orders.
<b>DepoPer001Lot</b>	Automatic lot size as the specified deposit amount per 0.01 lot. If more 0 then <b>Lot</b> is not taken into account
<b>Take Profit</b>	Fixed take profit value in points.
<b>Dynamic TP: Channel Percent</b>	Take profit calculated as the specified percentage of the current channel width of the BB indicator.
<b>Dynamic TP: Min Size</b>	The minimum take profit value when using 'Dynamic TP: Channel Percent', in points.
<b>TP: Include Swap and Comission</b>	Consider Swap and Comission to count Take Profit
<b>&lt;== Extra Settings ==&gt;</b>	<b>Extra Settings</b>
<b>StopOpenNewOrders</b>	Pause to open new grid orders
<b>Max Spread BUY</b>	The maximum allowable spread in points for Buy orders
<b>Max Spread SELL</b>	The maximum allowable spread in points for Sell orders
<b>Stop Loss</b>	Stop Loss in points for all grid. When 0 - off
<b>ExitDDPercent</b>	Drawdown percentage to force close all orders
<b>Exit DD Currency</b>	Drawdown currency value to force close all orders
<b>StopByMaxDD %</b>	Drawdown percentage at which the EA is not allowed to open new grids

<b>StopByMaxDD: Allow Opposite Enter</b>	If true and DD increase StopByMaxDD % EA allow to open the opposite direction orders.
<b>StopByMaxSymbolTrades</b>	The maximum number of trading pairs allowed in the market at a time
<b>StopEqualCurrencyTrade</b>	Check the unidirectional trading pairs in the market and prohibit entries on them. If equal 1, after first open symbol other unidirectional will be block. You can use several symbols before block
<b>StopEqualCurrencyDelay</b>	Random delay before checking the filter for StopEqualCurrencyTrade currencies from 0 to 10 seconds. It is needed to avoid unwanted entry in two symbols at once, if signals on the current tick appear simultaneously on them.
<b>CurrencyTradeMaxHours</b>	Pass the Equal Currency over time in hours
<b>&lt;== ENTER SETTINGS ==&gt;</b>	<i>Enter settings</i>
<b>&lt;= Bollinger Bands Settings =&gt;</b>	<i>Settings of Bollinger Bands</i>
<b>BB: Period</b>	Period of the Bollinger Bands indicator.
<b>BB: Deviation</b>	Deviation of Bollinger Bands.
<b>BB: Delta</b>	Indent of the BB indicator from the boundaries (can be in both direction), in points.
<b>BB: Min Channel Width</b>	The minimum width of the BB channel at which the EA is allowed to trade, in points.
<b>&lt;== CCI Settings ==&gt;</b>	<i>Settings of Commodity Channel Index</i>
<b>CCI: Period</b>	Period of the Commodity Channel Index indicator. If 0, the indicator signal is ignored.
<b>CCI: Level</b>	Level of the CCI indicator. Calculated for the opposite signs. That is, at 'CCI: Level = 100' the levels 100 and -100 will be used.
<b>&lt;== Candle Size Filter ==&gt;</b>	<i>Settings of Candles filter</i>
<b>UseMaxCandleForAllOrders</b>	Use the maximum candle size filter for all orders of the grid. If False, it is used only for the first order.
<b>Max Candle Size</b>	The maximum sum of the last N candles' lengths (from High to Low), above which the EA will not open new orders.
<b>Bars For Analyze</b>	The number of recent candles on the chart to analyze the candle sizes.
<b>&lt;== GRID SETTINGS ==&gt;</b>	<i>Grid settings</i>
<b>ATR Period for Distance</b>	ATR period for calculating the minimum allowable distance between grid orders.
<b>ATR Multiplier</b>	Multiplier for the ATR value.
<b>Multiplier 3 level</b>	Lot multiplier, used only for the third level of the grid. The second level is always opened with the initial lot size.
<b>Multiplier &gt; 3 level</b>	Lot multiplier for the grid, starting from the fourth level.

<b>Same Grid Orders Lot Size</b>	<p>The number of orders in a row in which the lot will be the same. If the value is 0, it is off and the function is not involved in the calculation.</p> <p><i>For example:</i></p> <p><i>Multiplier&gt; 3 level = 2, Same Grid Orders Lot Size = 2: 0.01-0.01-0.02-0.02-0.04-0.04-0.08-0.08 -...</i></p> <p><i>Multiplier&gt; 3 level = 2, Same Grid Orders Lot Size = 3: 0.01-0.01-0.01-0.02-0.02-0.02-0.04-0.04-0.04-0.08-0.08-0.08 -...</i></p>
<b>TPDecreasePercent</b>	Reduce the TP of the grid by the specified percentage every time a new grid levels is opened.
<b>Breakeven Level</b>	Number of level to start move the grid Take Profit to breakeven.
<b>Breakeven Step</b>	The offset from the level of BE in the old points. (use to compensate for swaps and commissions when transferring time-delayed)
<b>Max Open Grid Level</b>	Maximum amount of open grid orders.
<b>Averaging_Level</b>	Number of the levels at which the lot multiplication stops and the lot size is set equal to the last used value.
<b>&lt;== EXIT SETTINGS ==&gt;</b>	
<b>Exit Profit Percent</b>	Percentage of take profit, at which the four filters for exiting positions start working.
<b>Exit BB Filter: Out Channel Distance</b>	Distance from the opposite channel boundary of the BB indicator in points, at which the closure will occur.
<b>Exit CCI Filter: Period</b>	Period of the CCI indicator to force close the position when an opposite indicator signal appears.
<b>Exit MA Filter: Period</b>	A position is closed when the Moving Average with this period changes direction.
<b>Exit Time Filter: Minutes</b>	The number of minutes since last order, after which profitable positions are closed.
<b>1 ORDER TRADE TIME FILTER</b>	<i>First order trade settings</i>
<b>GMT Offset</b>	Time offset of the broker server from GMT, in hours.
<b>Start Trade Hour</b>	Start trading hour
<b>Start Trade Minute</b>	Start trading minutes
<b>End Trade Hour</b>	End trading hour
<b>End Trade Minute</b>	Минуты окончания торговли.
<b>1 ORDER ROLLOVER FILTER</b>	<i>First order rollover settings</i>
<b>Rollover Filter</b>	If true, activates the filter.
<b>Start Rollover Hour</b>	Hour for start rollover pause filter.
<b>Start Rollover Minute</b>	Minutes for start rollover pause filter.
<b>End Rollover Hour</b>	Hour for end rollover pause filter.
<b>End Rollover Minute</b>	Minutes for end rollover pause filter.

<b>&lt;== New Year Filter ==&gt;</b>	<b><i>New Year filter</i></b>
<b>Use New Year Stop Filter</b>	If true, then the filter is activated and on the specified days the input signal will not be analyzed. During Christmas and New Year, the market has low volatility, but often there are sharp movement that must be avoided.
<b>Start New Year Day (December)</b>	The first day of stopping signal analysis for the first order with NY filter. Already opened orders will continue trading until they will be closed.
<b>End New Year Day (January)</b>	Last day of New Year filter using
<b>&lt;== OTHER SETTINGS ==&gt;</b>	<b><i>Other graphic and text settings</i></b>
<b>Journal Info Language</b>	Choose language for journal information posted by EA
<b>Show Panel</b>	Show information panel on the chart
<b>Show Signal Points</b>	If true, lines will be displayed on each candle of the chart in the form of fixed values of the Bollinger Bands indicator +/- BB:Delta indicator channel.
<b>Panel Color</b>	Color of the information panel
<b>Logging Mode</b>	Show logs in the journal: All, Only Errors or Off.
<b>Write Log File</b>	If true, then the EA will create a text file with logs by the action of this advisor. Location in the terminal data directory: MQL4> Files (during trading), Tester> Files (during testing) under the name "Night Hawk 14". This information may be needed by developers to search for possible trading errors.
